AMY HERFURTH PHOTOGRAPHY

LAURA HENDRICKS, WEDDINGS BY STARDUST

“Shades of yellow, oranges and peach are some of the most beautiful colors found in floral, so I started there for color inspiration. I think yellow is one of the most understated colors in nature! Following that, I wanted to pair it with a color that didn't look too 'varsity' - yellow and blue/navy/green which is how I landed on the lavender color. Using the tree on property created the perfect setting to add to the existing beauty of the venue. I love how the yellow pops against the natural background. This was a light, crisp look that was exactly what I was trying to create in an outdoor setting.”
